BUILDER **MANNING SQUIRES HENNIG CO, INC.**
8426 Seven Spring Road
Batavia, New York 14020

PROJECT DESCRIPTION

Lathrop Hall was built in 1951 and originally served as a 30,478 SF student union and dining hall. Prior to the project, the building housed traditional classrooms, miscellaneous administrative functions, and the University Police Department.

This project was an $11 million redesign to create a School of Nursing that reflects modern healthcare and educational practices. The University Police continue to occupy the ground level of the complex in a renovated, accessible, new command & control center. The design included enhanced technology, new windows, roof, interior walls and finishes, and building-wide MEP systems. State-of-the-art laboratories and classrooms, group study areas, large group meeting spaces and swing spaces make Lathrop a prime example of higher education learning facilities. The project was designed to LEED Silver specifications.

PARTICIPATION

As Capital Projects Coordinator for the SUNY College at Brockport, David Strabel was responsible for coordinating design and construction activities, including acquisition and implementation of all of the furnishings and equipment, and the management of the moves.
