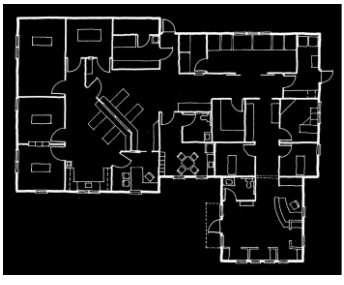
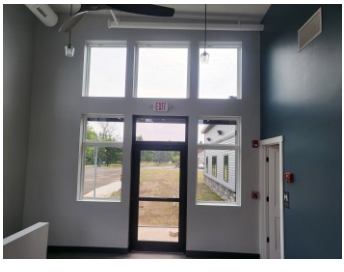
BUILDER **MGB BUILDING INC.**
1241 Hilton Parma Corners Road
Hilton, New York 14468

PROJECT DESCRIPTION

This 3,828 SF new build animal hospital stands indepently at the end of a professional office plaza. The veterinary surgical practice features 2 exam rooms, 4 proceedure areas, 3 operatories, recovery kennels, lab, x-ray imaging area, clean and soiled supply rooms, mechanical room, office, break room, restrooms for staff and public, and reception/waiting area. The building form is a series of interconnect low-sloped-roof volumes which helps minimize the cubic area of the proceedural zones due to the masive amounts of heated and cooled fresh outside air required. It also gives the building a comtemporary feel along with the high windowed space in the entry/reception lobby.





PARTICIPATION

Preliminary design and equipment layout by Todd Campbell used to create a permit set of construct-gram drawings by David Strabel with CAD drawing assistance from Steve Palmeri.
